Secure High-Speed Messaging Increases Efficiency, Lowers Costs

SES Direct is an interoperable, secure, cloud-based clinical data integration (CDI) solution. SES Direct enables healthcare payers to collaborate with providers in real-time, streamlining claims processing while easing administrative burden, reducing risk and lowering costs.

SES Direct enables payers and providers to share clinical data on any platform.

SES Direct:
- Lowers Complex Claims Processing Times by 50-75%
- Increases ROI on Risk Adjustment Optimization Investments
- Reduces Tedious Paperwork
- Speeds Decision-Making
- Connects Payers with Providers Across Health Systems
- Enables, Secure Clinical Data Sharing

Clinical data integration (CDI) is a core capability that you can apply to obtain clinical data from providers for care management, risk adjustment optimization (RAO), quality improvement and payment integrity use cases.

Gartner, 5 Actions U.S. Healthcare Payer CIOs Must Take When Purchasing Risk Adjustment Management Systems. Published: 31 January 2019 ID: G00369402

Get the Information You Need About Your Members Faster

- Secure and highly scalable
- End-to-end solution seamlessly integrates with existing IT investments
- Streamline claims processing and reimbursement
- Eliminate faxing and paper documentation
- Send/receive all types of attachments
- HITRUST® CSF Certified, DirectTrust™ Accredited, ONC-HIT 2015 Certified

---

SES Direct speeds payer provider communication, improving decision-making to optimize value-based care reimbursement models.

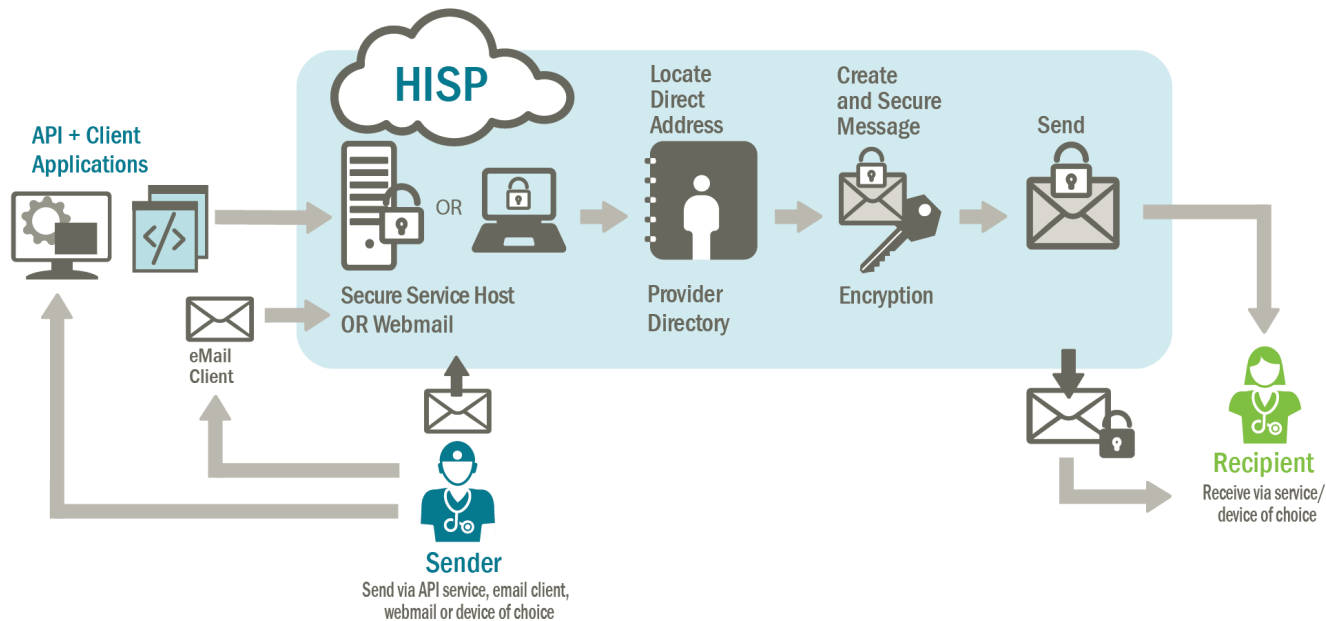

Highlights

SES Direct delivers clinical data to inform claims and payment decisions, simplifying value-based reimbursement for payers.

SES Direct eliminates faxing and paper documents and increases efficiency, resulting in greater payment integrity and accelerated data exchange across disparate systems.

- Improves care management, claims processing
- Speeds medical chart acquisition and increases percentage of records received from providers
- Conveniently retrieve data via secure email or mobile
- Highest security protocols and standards, safeguards data

Designed to seamlessly integrate within existing IT systems, the SES HISP allows *for rapid deployment without placing undue burden on your IT staff or budget.*

Companion Services
Additional service modules can be added to improve care coordination. From automated event notifications, to advanced directory services, and supports our time-saving templates and tools to improve user productivity.

SES Notify
Customized event notification service proven to improve care coordination, increase patient satisfaction and reduce preventable readmissions while avoiding alert fatigue.

SES Directory Synchronization
Search and sync your provider database with SES Directory Services for maximum connectivity

SES Forms
Secure form-based communications accessible within an application or via a web browser. Ideal for expediting prior-authorizations, claim attachments, medical equipment requests, plan of care documents and more. Proven to deliver improved productivity, evidenced by 50-75% reduction in processing.

SES C-CDA Viewer
Provides users who don't have access to Direct messaging within an EHR with an alternative to display and print structured care summaries received from hospitals or providers

SES Concierge Domain
Brand your Direct messaging solution with a concierge domain, including an optional branded portal.

Profile Management (Direct Route)
Supports user-defined message handling. Ideal for users with multiple Direct accounts, multiple EMRs or for managing temporary messaging reassignment (e.g. vacation coverage).

Who we serve.
Hospitals, providers, pharmacies, health plans and application partners rely on SES to exchange and analyze health care information.
