# Simplified Clinical Data Exchange, Speeds Requests and Reimbursements

SES FETCH simplifies the transition to value-based reimbursement by providing health plans with an automated risk adjustment solution to speed clinical data exchange, streamline provider requests, and eliminate manual practices.

Supportive of HEDIS and Stars Measures, **SES FETCH** is cost-effective to implement, integrating easily into the existing workflow. Able to request and retrieve medical records from multiple payer-defined data formats, portals, and other exchange mechanisms, SES FETCH simplifies the process by delivering consistent results to speed decision-making.

By simplifying clinical data exchange, **SES FETCH** speeds the transition to value-based reimbursement, increasing efficiency and lowering costs.

Easily and efficiently request, manage, retrieve and exchange clinical data, all within a secure standards-based format.

The Metrics of Clinical Exchange

~$10B
Total Market Chart Retrieval

~$15-$33
Costs of Manual Chart Request

~$5
Charts in Indexable Electronic Format, Can Save OCR Costs of $3-5/per Chart

~$20
Average Savings of $10-20 per Chart via Direct Exchange

Highlights

- Retrieval and normalization of (CCD) and PDF, scanned charts, and lab information

- Supports request/response, with the option of web application for data entry

- Filtering of necessary clinical data from EMRs direct to plans

- Integration with EMR systems

- Interoperability through existing standards, including Direct, Fast Healthcare Interoperability Resources (FHIR), X12 278 and 275 semantic XML modes, and more

- OCR (including handwritten material and forms), PDF documents, and images

- Data normalization

## Simplify the Transition to Value-Based Reimbursement

SES FETCH leverages existing standards, such as the HL7 Clinical Document Architecture (CDA) adopted by all EHRs, SES FETCH simplifies and speeds access to critical clinical data required for:

- Care Coordination and Management

- Claims Attachments and Denial Management

- Risk Adjustment, HEDIS and Star Measures

- Care Gap Management

- Concurrent Utilization Review

- Level of Care Determination

PROVIDER SYSTEM
- EMR
- PROVIDERS
- DOC MGMT SYSTEM

CLINICAL DATA EXCHANGE
- FHIR
- IHE
- API
- DIRECT

UNSTRUCTURED DATA

SES FETCH
- Data Acquisition
- Data Aggregation
- Data Normalization
- Data Filtering

- MEDICAL NECESSITY
- PRIOR AUTHORIZATION
- CLAIM REVIEW
- HEDIS
- STARS
- RISK ADJUSTMENT

PLANS / PAYERS
- Commercial
- CMS
- Other

DATA CONVERSION
Scanning, OCR, Data Conversion

SES FETCH leverages industry standard protocols to support HIPAA-compliant data exchange, ensuring plan-provider interoperability without complex interfacing, fax/paper processes or long wait times for provider responses.

SES FETCH supports the indexing, normalization, transformation, and retrieval of clinical information in a secure and scalable way and includes:

- Acquisition of normalized Continuity of Care Document (CCD) and Optical Character Recognition (OCR) information via standard exchange mechanisms
- Request/response capability
- Filtering of Consolidated Clinical Document Architecture (CCDA) from EMR systems to plans
- Compatibility with X12 277 and 275 semantic XML modes
- Integration with EMR systems
- Verification of e-Signatures

Security

- **Secure Infrastructure:** Robust, secure, highly elastic, scalable cloud service
- **Privacy and Security:** Rigorous security technologies and processes to enforce adherence to HIPAA privacy and security standards including end-to-end encryption and testing
- **Audited and Accredited**

Secure Exchange Solutions nationwide network of 2.7M+ providers gives plans the access they need for accelerated data retrieval and exchange. We deliver efficiencies and cost savings through our electronic health record (EHR) systems and HIT application channel partners.

Our focus is on delivering standards-based solutions that meet the changing needs of health plans and providers to successfully transition to value-based reimbursement models, while facilitating member retention.

Who we serve.
Hospitals, providers, pharmacies, health plans and application partners rely on SES to exchange and analyze health care information.

- Hospitals & Health Systems
- Public & Commercial Health Plans
- Post Acute Care Providers
- Pharmacies
- 90 Integrated EHR & Health Application Vendors
- 300+ EHRs in the Trust Community
